Mia 2 showerhead

INSTALLATION

Before installing the showerhead, flush the pipework through to remove any debris that may be in the system.

CLEANING

Triton recommends that all products are cleaned using warm, soapy water.

DO NOT use abrasive or aggressive chemical cleaning products as this may affect the product surface and finish.

NOTE: Before cleaning, turn off the unit at the mains supply to avoid the shower being accidentally switched on.

The showerhead may be cleaned by simply rubbing your thumb over the spray plate.

IT IS IMPORTANT TO KEEP THE SHOWERHEAD CLEAN TO MAINTAIN THE PERFORMANCE OF THE SHOWER. The hardness of the water will determine the frequency of cleaning. For example, if the shower is used every day in a very hard water area, it may be necessary to clean the showerhead on a weekly basis.
